Summary

Health, Safety & Environment (HSE) professional holding a Bachelor's degree (04 years) and a Diploma (03 years) in Health, Safety & Environmental Engineering, certified with IOSH Managing Safely & OSHA 30 hours certifications. About **07 years** of experience in the field of **Civil/ building construction, infrastructure, Roads & Bridges, and precast concrete (Qatar Gas (CTJV) and NFE Projects), as well as MEP and Architecture works at Qatar Metro Rail projects**, which has enabled me to possess a good knowledge of the local regulations in, preparation of HSE plans and Standard Operating procedures for the lifting operations, confined space, excavation works, emergency procedures, risk assessment and job safety evaluation procedures, investigation of accidents and their root causes, preparation of HSE training modules etc.

Successfully improved safety within Multi National Contractors. Reduced incident/ accident rates in most cases to minimal. Changed people's behavior and attitude towards safety from management level to employees, and achieved a positive commitment to the way people think about safety. Produced effective Safety, Health & Environmental programs for individual companies. Committed project management teams to effecting and eliminating hazards/ risks. Reviewed HSE Policies and Procedures/ Manuals, Emergency Response Procedures and advised to improve, where required.

I believe that my skills & experience will help the management to add real value to the company in the field of Health, Safety & Environment and enhance its overall risk management environment with concern to be profitable.
