## Career Profile

Having an extensive 11 years of experience in the field of HSE Management System in construction industries. During my career in Health, Safety and Environment I have been involved in a diversified range of large construction Projects mostly in Gulf region, (Qatar & UAE) these contracts required strong HSE Management skills and good communication with multi nationals. My duties have covered all issues pertinent to HSE. I am adaptable to Client requirements and workloads, resulting from broad experience of industrial safety practices and familiarity with international standards and have a clear grasp of HSE fundamentals.

## Employment History

### 1. American International Contractors Inc.

Designation: HSE Deputy Manager  
Duration: 2025 to till Now  
Project: Al Udeid U. S. military base, Qatar  
Client: Northrop Grumman

**Duties & responsibilities:**

- Ensure compliance with Qatar's Ministry of Labor safety regulations and Qatar Construction Specifications (QCS).
- Conduct regular safety inspections and audits on the project site and monitor compliance with safety protocols and legal standards.
- Investigate workplace accidents, incidents, and near-misses, including those in confined spaces, and prepare comprehensive reports with corrective action plans.
- Collaborate with HSE Managers to implement corrective actions.
- Provide safety training and conduct toolbox talks for workers, focusing on confined space entry, safe work practices, and compliance with Qatar's safety regulations.
- Maintain safety records, training logs, inspection reports, incident registers, track and analyze safety KPI.
- Coordinate emergency response procedures, including those for confined space incidents, and conduct regular emergency drills as per Qatar's safety guidelines.
- Collaborate with management, site supervisors, and workers to address safety concerns, including confined space hazards, and promote a safety-first culture.
- Ensure proper signage, barricading, and safety equipment are in place, particularly around confined spaces, as required by Qatari laws and regulations.
- Help develop and implement emergency response plan.
- Assist in developing risk assessments and safety plans specific to projects involving confined space entry.
- Stay informed about the latest updates to Qatar's safety laws, confined space entry regulations, and industry best practices, ensuring the company's safety programs are compliant.

### 2. American International Contractors Inc.

Designation: HSE Officer  
Duration: 2022 – 2024  
Project: New Embassy Project Al Kheesa, Doha  
Client: OBO

**Duties & responsibilities:**

- Ensure compliance with Qatar's Ministry of Labour safety regulations and Qatar Construction Specifications (QCS).
- Develop and enforce safety policies and procedures in alignment with Qatari legal requirements, international standards, and specific confined space regulations.
- Conduct regular safety inspections and audits on the project site, including confined spaces, to identify potential hazards and ensure compliance with Qatari safety regulations.
- Investigate workplace accidents, incidents, and near-misses, including those in confined spaces, and prepare comprehensive reports with corrective action plans.
- Provide safety training and conduct toolbox talks for workers, focusing on confined space entry, safe work practices, and compliance with Qatar's safety regulations.
- Monitor the use of personal protective equipment (PPE), ensuring it meets QCS standards for both general site work and confined space entry.
- Coordinate emergency response procedures, including those for confined space incidents, and conduct regular emergency drills as per Qatar's safety guidelines.
- Maintain detailed safety records, including confined space entry permits, incident reports, training

logs, and safety audits, in compliance with local requirements.

- Collaborate with management, site supervisors, and workers to address safety concerns, including confined space hazards, and promote a safety-first culture.
- Ensure proper signage, barricading, and safety equipment are in place, particularly around confined spaces, as required by Qatari laws and regulations.
- Assist in developing risk assessments and safety plans specific to projects involving confined space entry.
- Stay informed about the latest updates to Qatar's safety laws, confined space entry regulations, and industry best practices, ensuring the company's safety programs are compliant.

### 3. PETROSERVE
