GENERAL ROLES & RESPONSIBILITIES

To check that Company Staff and sub-contractor, perform their activities in accordance with all the OHS applicable procedures, regulation, and standards, promoting all necessary action to ensure that the said procedures and regulations are observed.

- Develop, implement and maintain health, safety and environmental (HSE) policies, guidelines and procedures for oil and gas and construction projects.
- Ensure compliance with local and international laws and regulations on health, safety and environment.
- Conduct regular HSE audits and inspections to identify potential hazards and risks.
- Help develop and implement emergency preparedness and response plans for oil and gas and construction projects.
- Set up and deliver HSE training and awareness programs for workers and staff.
- Conduct investigations into accidents, incidents, near misses or work-related illnesses and injuries, prepare reports and recommend corrective action.
- Collaborate with project managers, engineers and contractors to ensure HSE requirements are incorporated into project plans and specifications.
- Ensure the proper use and maintenance of personal protective equipment (PPE) and safety equipment.
- Review and approve work permit and risk assessments.
- Conduct safety meetings and toolbox talks for workers and contractors.
- Make regular site visits and field inspections to monitor HSE performance.

- Keep updated on new developments in HSE technology, regulations and best practices.
- Participate in HSE committees or forums of industry associations and organizations.
- Develop metrics and performance indicators to track HSE performance and provide reports to management.
- Liaise with government agencies, clients over HSE matters.
