#### CAREER HIGHLIGHTS

- Support the NFS Onshore EPC Project and all SHES related disciplines and scope of work. Supports SHES Lead as part of SHES representative for construction activities.
- Provides oversight in field for newly onboarded EPC CONTRACTOR, SUBCONTRACTOR(s) and vendors, to verify understanding and compliance to project SHES requirements.
- Monitor site SHES programs and safe work practices, and review and evaluate data/information/systems as required.
- Champion on-site SHES awareness and safe performance with CONTRACTOR and among PMT. Daily attendance of TOOL-Box Talks (TBT) and Task Instructions (TI), providing coaching and leadership to CONTRACTOR and its SUBCONTRACTOR(S) to ensure these fundamental communication tools are used to optimum levels.
- Supports the SHES Lead in providing oversight and guidance for site SHES and Regulatory compliance and performance during project fieldwork including compliance to RLC regulatory requirements. Review the

CONTRACTOR SHES Plan and Procedure implementation at site.

- Verification of SHES site resource allocation, competencies and performance in assigned area of responsibility. Monitor newly mobilized SHES personnel. Provide mentoring and promote development of SHES personnel
- Supports the establishment and maintenance of strong safety cultures in line with the QatarEnergy and Project vision, mission and values. Support and promote the project Observation & Intervention program and the Incident and Injury Free (IIF) program.
- Provides support to SHES Lead when interface with internal/external groups are required, e.g. QELNG Major Projects, CONTRACTOR, SUBCONTRACTOR(s), RLC etc.
- Demonstrate strong leadership and visible presence for in-field activities to build the safety culture and continual improvement on the project, through all phases of the work including SIMOPS.
- Participates in safety meetings as needed, including Area Leadership Team (ALT) meetings, and participates in meetings involving CONTRACTOR safety problems/incidents. Supports the SHES Lead (when required) in the participation of site safety reviews, walkthrough, audits, pre-start up safety reviews, investigations SHES assessment etc.
- Follow-up and verify progress of all outstanding SHES relevant corrective actions in support of SHES Lead including the timely follow-up and close-out of such actions.
- Monitor implementation and report compliance with HSE Regulations, Procedures, Permit to Work System and safeguards/control measures of risk assessments.
- Inspect facilities to ensure compliance.
- Identify fire, safety & life-saving appliances requirement and supervise maintenance of same to ensure reliable operation.
- Assists line supervisors in their planned inspection program.
- Provide advice to site on safe transportation, handling, storage and use of hazardous materials.
- Participate in development and communication of procedure.
- Monitor performance of contractors on site.
- Co-ordinate and arrange HSE meeting with contractors and highlights areas for improvements.
- Conduct post assessment of HSE performance of contractors. Responsibilities:
  - Monitor implementation of the approved HSE program.
  - Audits compliance with Health Safety and Environmental protection regulations and procedures.
  - Compliance with and Implement HSE Policy.
  - Conduct Toolbox meeting and ensure effectiveness.
  - Ensure regular site specific "Toolbox Talks" are delivered to all concerns which include Subcontractor's.
  - Monitor Permit to Work System, PPE compliance and enforcement.
  - Monitor safe work practices as per safety rules and regulations.
  - Prepare Near Miss Tracking registers.
  - Organize and conduct Crew Safety Meetings and HSE committee meetings.
  - Organize Emergency Teams and conduct emergency drills.
  - Prepare weekly/monthly safety reports.
  - Participate in Risk Assessment.
  - Organize Checklist for site inspection (Health Safety Environment) of all Plant, Facilities, Machineries, Tools, Equipment's, and Materials. As well as all employee's

safety & health hygiene at site.

- Audit, Inspect, Maintain & Inventory of all Safety Equipment, PPE etc.
- Conduct General safety audit. Conduct STOP and Behavioral Safety Audit.
- Inspect life-saving, fire-fighting equipment and H2S gas detector & other gas detectors / monitors to ensure reliable operation.
- Inspect all existing fixed and mobile plant and equipment and installations to ensure adherence to company's established safety rules, standards and codes of practice.
- Coordinate with Site Engineers in advising on any improvement in existing work methods and notify any potential hazards before work starts.
- Investigates industrial incidents/accidents and writes related statistical and analytical reports.
- Provide HSE coverage on all aspect at all level across the company operations.
- Coordinate with the Project Manager regarding work performance and shall have the authority to stop work in any area where discrepancies remain unsafe and shall cancel the stop work order upon satisfactory correction of noted safety deficiencies.
- Maintain overall good housekeeping to work sites.
