Skills

Professional Skills

- HSE Policy & Procedure Development
- Occupational Health & Safety (OHS) Compliance
- Risk Assessment & Hazard Mitigation
- Safety Audits & Regularly Inspection
- Compliance with ISO 45001 & OSHA Standard
- Incident Reporting and Investigation
- Report Writing & Documentations
- Emergency Response & evacuation Planning
- Problem Solving & Analytical Thinking
- Safety Management Software Proficiency
- Document Management System
- Team Leadership & Workforce Training
- Safety Performance improvement initiative
- Stakeholder Communication & Coordination

Technical Skills

- Microsoft Office Suite (Word, Excel, PowerPoint)
- Document Management Systems
- AutoCAD & Technical Drawings Interpretation
- Safety Management Software (PTW, RA, SSHP)
- Internet & File Management Proficiency
- Operating Systems: Windows, Linux, MacOS

Professional Summary

Highly experienced and forward-thinking HSE Professional with over 15 years of proven success in managing health, safety, and environmental operations across diverse sectors including petrochemical, oil & gas, pipeline, and major civil infrastructure projects in India and the Middle East. Currently serving as HSE Lead at the World's Largest LNG (Liquefied Natural Gas) North Field Expansion (NFE) project in Ras Laffan Industrial City under Qatar Energy and CTJV, supervising a dynamic team of 38 HSE Officers and Senior HSE professionals. Previously contributed to the successful delivery of high-profile projects such as Msheireb Downtown Phase 1B, Lusail Boulevard, and Barzan Onshore EPC, ensuring full compliance with client HSE requirements and international standards (QCS2014, OSHA, ISO 45001, ISO 14001). Earlier career experience includes key safety roles in Barouni Petrochemical and Shaha Construction, developing a strong foundation in site safety operations, risk control, and worker engagement. Recognized for building strong safety cultures, leading behavioural safety programs, implementing robust permit-to-work and incident prevention systems, and consistently achieving zero-LTI milestones. Adept in stakeholder coordination, emergency response planning, HSE training, and compliance auditing within high-risk, fast-paced project environments.

Core Competencies

- HSE Management Systems ISO 45001
- Oil & Gas EPC Safety Management
- Civil, Road & Infrastructure Project Safety
- Regulatory Compliance & Risk Mitigation
- Safety Leadership & Culture Building
- Incident Investigation & Root Cause Analysis
- Permit to Work (PTW) Systems
- Contractor HSE Oversight & Auditing
- Behaviour-Based Safety (BBS) Initiatives
- Emergency Response Planning & Training
- Environmental Impact Assessments
- Team Mentoring & HSE Competency Development

Professional Experience

- ✓ HSE Officer: North Field East (NFE) Expansion Project – Ras Laffan, Qatar
Company: Consolidated Contractors Groups S.A.L (CCC)
Client: Qatar Energy / Chiyoda Technip JV (CTJV)
Period- 10 February 2024 to present
- ✓ HSE Officer: Msheireb Downtown Phase 1B Doha, Qatar
Company: Consolidated Contractors Groups S.A.L (CCC)
Client: Msheireb Property
Period: 12 June 2017 to 10 May 2020

Language Skill

- **English- Fluent**
- **Hindi- Fluent**
- **Bengali- Fluent**

Professional Education

- Currently Pursuing: NVQ Level 7 Diploma in Strategic Health & Safety Leadership & Management
- NVQ Level 6 Diploma in Occupational Health & Safety (Pro Qual, UK)
- NEBOSH International General Certificate
- ISHO 45001 Lead Auditor
- Diploma in Industrial Safety Management – Jharkhand Industrial Training Institute
- IOSH Managing Safely (UK)
- OSHA 30 Hours Safety Training (USA)

Certification & Training

- Authorized Gas Tester
- Basic First Aid & CPR Certification
- HSE Awards – Qatar Energy LNG, Msheireb, RASGAS, JGC
- Safety Management & Leadership Training
- CCC OSHA Outreach Training (LCB Project)
- IIF Supervisor Skill Training
- Golden Rules, Permit to Work, Hydrogen Sulphide, Escape BA (RAS GAS)

Education

- MATRICULATION WITH 50% IN THE YEAR 1999 B.S.E.B., PATNA.
- HIGHER SECONDARY (I.S.C.) WITH 65% IN THE YEAR 2001 FROM XAVIER'S INTERNATIONAL UNIVERSITY, BALI, GOA.

- ✓ HSE Officer: Lusail Commercial Boulevard Project
Company: Consolidated Contractors Groups S.A.L (CCC)
Client: Parson / Dorsch
Period: 01 November 2015 to 12 June 2017
- ✓ HSE Officer: Barzan Onshore EPC Project
Company: Consolidated Contractors Groups S.A.L (CCC)
Client: Qatar Energy / Japan Gas Corporation
Period: 16 May 2012 to 31 October 2015
- ✓ Safety Officer: Barauni Petrochemical & Oil Refinery (Govt. of India)
Company: Barouni Petrochemical
Client: Bokaro Oil Refinery
Period: August 2008 to May 2011
- ✓ Safety Officer: Shah Construction
Company: Shah Building Construction
Client: Tata Iron & Steel Co LTD
Period: April 2004 to June 2008

Role And Responsibilities

- Implemented and enforced project-specific HSE policies and procedures in alignment with OSHA, ISO 45001, and client standards.
- Conducted detailed hazard identification, risk assessments, and job safety analyses (JSA) for site activities and high-risk operations.
- Managed and monitored the Permit to Work (PTW) system including Hot Work, Confined Space, Excavation, and Electrical Isolation.
- Supervised daily site operations, including civil works, structural erection, MEP installation, and mechanical commissioning.
- Delivered effective Toolbox Talks and safety briefings to enhance worker safety awareness and task readiness.
- Ensured proper selection and use of Personal Protective Equipment (PPE) according to task-specific risks and client HSE requirements.
- Oversaw LOTO (Lockout/Tagout) procedures during testing, energization, and maintenance activities.
- Monitored confined space entries ensuring gas testing, rescue readiness, and atmospheric control compliance.
- Reviewed and approved method statements, work procedures, and lifting plans for high-risk construction and EPC tasks.
- Investigated incidents, near-misses, and unsafe conditions; conducted root cause analysis (RCA) and followed up on corrective actions.
- Conducted site inspections, internal HSE audits, and walkdowns with project stakeholders and third-party consultants.
- Supervised heavy lifting, crane operations, and rigging activities in accordance with load charts and lifting plans.

Achievement

- Honoured with multiple HSE performance awards from Qatar Energy, Msheireb, RASGAS, and JGC.
- Played a key role in achieving zero major incidents across multiple large-scale Oil & Gas projects.
- Recognized for leadership in proactive hazard mitigation and implementing safety innovations.
- Successfully trained and mentored over 100+ workers in safety best practices and emergency protocols.
- Recipient of “Solution Band Award” for safety process improvement initiatives.

Personal Details

- Fathers Name- MD. Barik
- Date Of Birth- 10 May 1981
- Nationality- Indian
- Religion- Islam
- Marital Status- Married
- Sex- Male
- Height- 180 cm

Passport Details

- Passport Number: U0585432
- Date of Issue: 14 October 2019
- Expiry: 13 October 2029
- Place of Issue: Doha, Qatar

Role And Responsibilities

- Supported safe execution of commissioning and pre-commissioning activities by verifying isolations, safety precautions, and permit validations.
- Coordinated SIMOPS (Simultaneous Operations) and ensured risk control during overlapping EPC and commissioning tasks.
- Conducted emergency response drills, evacuation simulations, and toolbox rescue demonstrations.
- Monitored fire safety, hot work operations, fire watch duties, and compliance with fire prevention procedures.
- Ensured environmental protection, waste management, and spill response procedures were implemented properly.
- Maintained complete HSE documentation, including daily reports, inspection records, training logs, and incident registers.
- Delivered safety induction training and site-specific orientation to new workers and subcontractors.
- Advised MEP and construction supervisors on site safety compliance, safe work practices, and hazard mitigation strategies.
- Promoted a proactive Behaviour-Based Safety (BBS) culture through coaching and worker engagement programs.
- Liaised with EPC contractors, consultants, and client HSE teams for compliance and progress tracking.
- Ensured safety compliance during electrical works, HVAC, plumbing, cable routing, and equipment installation.
- Participated in client HSE meetings, presented safety KPIs, and tracked progress of leading and lagging indicators.
- Played a key role in achieving Zero LTI and contributed to the successful delivery of project HSE milestones.

Pre-Commissioning & Commissioning Phase

- Implemented and monitored PTW systems, ensuring all commissioning activities (Pneumatic test, nitrogen purging, energization, Chemical Flashing) were executed under strict safety controls and in coordination with operations teams.
- Conducted risk assessments and reviewed JSA/method statements for pre-commissioning scopes, including leak testing, system flushing, and mechanical completion.
- Supervised SIMOPS conditions in live areas during commissioning interface, ensuring safety of personnel during overlapping construction and commissioning tasks.
- Oversaw gas testing, confined space entry, and LOTO procedures during energization and pre-startup checks for process and utility systems.
- Delivered targeted Toolbox Talks, conducted incident investigations, and supported zero-LTI achievements through proactive field engagement and safety leadership.

Declaration

I hope the above information will meet your requirements. Further I assure you if an opportunity is given; I will satisfy the management by performing the task within scheduled time and cost.

Thanking You

Md. Imran
