

Objectives: Open to challenging roles such as **Project HSE Manager, Deputy HSE Manager, HSE Advisor, or HSE Supervisor**. To leverage 12 years of specialized experience in Safety, Health, Environment, and Security (SHES) management within the Oil and gas, high-rise construction, MEP and underground utilities sector driving continuous improvement in project safety and compliance. I aim to lead and implement best-in-class SHES practices, ensuring the successful integration of robust safety management systems, fostering a culture of zero harm, and supporting the efficient delivery of projects within budget and schedule. Dedicated to enhancing operational safety standards, mitigating risks, and achieving sustainable project outcomes with a focus on injury-free environments and regulatory excellence.

Key Aspects:

- ❖ Experience, Action-Oriented, Specific to Industry, Results-Driven, Professional Tone

Essential Skills:

- **Strong Analytical Skills & Problem-Solving Mentality:** Team player with strong interpersonal skills, able to work independently; performance-oriented with strong initiative, computer literate.
- **Construction Standards & Procedures:** In-depth knowledge of construction industry standards, including Qatar Construction Standards (QCS), procedures, and best practices, ensuring compliance across all stages of the project lifecycle.
- **Regulatory Compliance & Auditing:** Strong understanding of national and international regulations (e.g., ISO standards), Qatar laws, QCS, Qatar Environmental Law and Qatar energy specifications to maintain compliance in major construction, MEP and major oil and gas.
- **Inspection & Testing:** Proficient in conducting and managing inspections, non-destructive testing (NDT), and mechanical testing procedures to ensure the integrity and safety of construction and MEP systems.
- **Risk Assessments:** Skilled in performing risk assessments to identify potential quality issues, ensuring mitigation measures are in place according to safety and quality guidelines in construction and MEP work.
- **Documentation Expertise:** Proficient in maintaining detailed documentation for quality processes, including inspection records, audit reports, and non-conformance reports (NCRs), ensuring alignment with QCS and industry standards.
- **Quality Improvement Projects:** Experienced in leading quality improvement initiatives to enhance operational efficiency and reduce waste in construction and MEP projects.
- **Vendor Management:** Familiar with managing supplier relationships, evaluating vendor quality, and ensuring procurement meets the rigorous quality standards of construction and MEP projects.
- **Commissioning & Startup Activities:** Expertise in conducting pre-commissioning, commissioning, and startup activities in line with quality assurance protocols for construction and MEP systems.
- **Cross-Functional Collaboration:** Adept at collaborating with cross-functional teams (engineering, procurement, construction) to integrate quality management systems and procedures into project execution.
- **HSE (Health, Safety & Environment) Integration:** Skilled in integrating quality management with HSE guidelines, ensuring compliance with safety and environmental standards, including Qatar Environmental Law.
- **Root Cause Analysis & Corrective Actions:** Proficient in conducting root cause analysis (RCA) to resolve issues, implement corrective actions, and improve system reliability in construction and MEP projects.
- **Planning & Organizational Skills:** Well-developed planning, organization, and implementation skills, with the ability to communicate in a practical and commercial manner at all levels.
- **Regulatory Knowledge:** Well-versed and highly experienced in international and local regulations and legislations, including Qatar Construction Standards (QCS) and Qatar Environmental Law, with in-depth knowledge of ISO 45001:2018 (OHSM), ISO 14001:2015 (EMS), and ISO 9001:2015 (QMS).
- **Management Systems:** Familiar with implementing and working within management systems for construction and real estate development projects.
- **Action & Mitigation Plans:** Skilled in developing action plans and mitigation strategies to address risks and project challenges effectively.
- **Technical Proficiency:** Proficient in producing quality written reports in English and in using MS Excel, MS Word, and MS PowerPoint.
- **Project Management Skills:** Experienced in risk assessments, contracts, H&S audits, quality management systems, and the execution of engineering, procurement, and construction (EPC) projects.
- **Leadership & Communication:** A leader and people-oriented professional with strong program execution skills; creative, insightful,

and effective in written, verbal, and graphic communication.

- **Qatar Energy Standards & Procedures:** In-depth knowledge of Qatar Energy's operational standards, procedures, and best practices, ensuring compliance across all stages of the project lifecycle.
- **Proficient in conducting and managing inspections:** NDT, and mechanical testing
