■ PROFESSIONAL EXPERIENCE:

I am a dedicated and highly experienced professional with over 14 years of expertise in the Health, Safety and Environment field, I have worked in various projects and with well-known clients. This experience has provided me with a deep understanding of the safety requirements of every construction project and the ability to develop and implement effective HSE measures for the safety of workers and the environment. It has also allowed me to build relationships with key personnel (colleagues) and ensure that the project remains in compliance with all applicable safety rules and regulations.

■ RESPONSIBILITIES:

- ❖ Ensure that operation employees, contractors and site visitors receive HSE induction.
- ❖ Make sure that all employees participating in specific hot work activities, work-at-height activities, or other hazardous activities have received training.
- ❖ Make sure all work permit requirements are met at the job site. Provide workers and supervisors with knowledge of the JSA and risk assessment before the work begins.
- ❖ Supervise, monitor, maintain and implement HSE management system program to ensure compliance in accordance with Client's Construction Safety standards.
- ❖ Assure that all equipment and operators on the jobsite are certified/qualified in order to perform the task safely.
- ❖ Assess and identify work areas potential hazards and health issues, and implement appropriate control measures.

- ❖ Investigate the root cause HSE complaints put forward by staff members, clients and contractors and report the result to the management.
- ❖ Coordinate and participate in the investigation of accident and near misses.
- ❖ Review and analyze accidents and near miss incidents and make corrective action recommendations.
- ❖ Participate in the scheduled weekly safety walk-through and meeting with the client representative to identify potential workplace hazards and develop effective mitigation controls.
- ❖ Ensure all the equipment meets appropriate safety standarrd; Daily, monthly inspections are conducted for all the heavy equipment on the job site.
- ❖ Check personal protection equipment (PPE) and check that hazardous materials are stored correctly.
- ❖ Coordinate and ensure regular emergency response exercises and drills are conducted.
- ❖ Supervise on-site medical emergency response preparation and implementation.
- ❖ Supervise the regular inspection of firefighting, safety and emergency response equipment.
- ❖ Responsible for preparing weekly and monthly HSE reports, statistics and presentations related to HSE performance.
- ❖ Attending tool box talks to all workers of particular work before work starts.
- ❖ Handling all the HSE Documents at office, DAILY reporting to the Department Head of observation and rectifications.

- ❖ Preparing weekly toolbox talks presentations.
- ❖ Preparing weekly, man-hours report accumulative.
- ❖ Maintaining effective and timely contact with the relevant team for any issue to prevent property damage or other mishaps on the job site.
