**Position: HSE Specialist**

**Organization: Bank Alfalah Pvt Limited (Pakistan).**

**Duration: Dec 2021-May 2023**

#### **Roles and Responsibilities:**

- **HSE Compliance and Regulations:**  
Stay updated on relevant health, safety, and environmental regulations, both at the local and international levels. Ensure the bank's operations comply with bank-specific regulations and international HSE standards to avoid legal and financial consequences.
- **Risk Assessment and Management:**  
Identify potential health, safety, and environmental risks within banking facilities, including branches, offices, and data centers. Conduct regular risk assessments to evaluate potential hazards and develop strategies to mitigate them. Collaborate with internal teams to develop and implement risk management plans, emergency response procedures.
- **Training and Education:**  
Develop and deliver training programs to educate employees about safety procedures, emergency protocols, and best practices. Raise awareness about environmental conservation and sustainable practices among staff members.
- **Incident Investigation:**  
Investigate accidents, incidents, and near-misses to determine root causes and prevent future occurrences. Develop recommendations for corrective actions and improvements based on investigation findings.

- **Safety Inspections and Audits:**

Perform routine inspections of banking facilities to identify potential hazards, unsafe practices, and compliance gaps.

Conduct audits to assess the overall effectiveness of the bank's HSE programs and suggest improvements where necessary.

- **Environmental Management:**

Collaborate with relevant stakeholders to manage the bank's environmental impact, including waste management, energy consumption, and carbon emissions.

Implement sustainable practices to minimize the bank's ecological footprint.

- **Emergency Preparedness:**

Develop and maintain emergency response plans tailored to the banking environment, addressing scenarios such as natural disasters, security breaches, and technological failures.

Conduct drills and simulations to test the effectiveness of emergency plans and ensure all employees are familiar with their roles.

- **Data Analysis and Reporting:**

Collect and analyze HSE-related data to identify trends, track progress, and generate reports for management.

Use data insights to recommend strategies for continuous improvement.
